

VICTORIA AVENUE PRIMARY SCHOOL

Victoria Avenue Primary School is integral to the education of hundreds of schoolchildren in Remuera. The school is one of Matrix Security's original customers but only recently engaged with our Technology Solutions team. Their existing security system was obsolete and had reached capacity. Redundant equipment was removed and a fit for purpose new security system was installed and tested.

“Victoria Avenue School have had a long and successful business relationship with Matrix Security. Safeguarding our learning environment is of great importance to us and we did not undertake this latest investment lightly. Matrix Security offered a very thorough assessment of our needs and managed the upgrade process in an integrated and professional manner.”
